

Colorado River District

Protecting Western Colorado Water Since 1937

MEMORANDUM

JULY 5, 2017

TO: BOARD OF DIRECTORS

FROM: CHRIS TREESE 

SUBJECT: 2017 RIVER DISTRICT POLICIES

Action: The Board should provide final review and approval of the revised Aging Infrastructure and Water Project Funding policies that are being presented for final review.

Attached are the second drafts of the revised Aging Infrastructure and the new Water Project Funding policies, revised pursuant to Board discussion and direction at the April quarterly. Recall that under your process for policy review and adoption, policies must be agenda-ed for at least two quarterly meetings before you take final action. Both policies meet this condition and are eligible for final action at your July meeting.

The Board reviewed and gave final approval at the April quarterly on the following policies that were up for triennial review:

- Colorado River Compact,
- Colorado's Allocation of remaining Colorado River Basin Water,
- Interstate Water Marketing,
- Colorado River Storage Project Act Projects, and
- Transmountain Diversions.
